PROJECTS

YELPCAMP

Users can register and upload camps and post comments. The whole project is set on Node.js using Express. Templating engine is EJS with Bootstrap on top responsiveness. Authentication handled with Passport.js and all data store with MongoDB. Users can create new camps or add comments to existing ones. All the URLs follow the RESTful routes principle. The project is deployed on Heroku Server.

DEVGROUND

A Social Network for developers. Users can sign up, create profile, write posts and comments and view other signed up developer profiles. FrontEnd built with React/Redux. and Bootstrap on top for responsiveness. Backend runs on Node.js with Express server. Authentication handled with Passport.js with JWT and all data stored with MongoDB. The project is deployed on a Heroku Server.
